## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-6, in the reply filed on October 6, 2006 is acknowledged. The traversal is on the ground(s) that Claims 1-20 had been acted upon and that the action was evidence that there was no undue burden placed on the examiner. This is not found persuasive because a restriction requirement can be made at any point in the prosecution. The claims are directed to patentably distinct inventions as evidenced by applicants remarks filed 6/13/2006 and the divergent subject matter to which the claims are directed.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1713

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyce et al. US4,284,542.

5. The rejection under 35 USC 103 set forth in the action mailed 12/15/05 is deemed proper and is herein repeated.

6. Applicants remarks filed 6/13/06 have been fully considered but have been found not persuasive.

7. Applicants acknowledge that the art shows each of the claimed ingredients, as outlined by the examiner in the first office action, but reaches the conclusion that "there is not [sic] suggestion of the use..." This is not persuasive. The suggestion of the incorporation of the Kraton polymers at column 6 lines 65+ renders obvious the claimed thermoplastic elastomer and the species of polymers as requisite claim 5. These are the preferred polymers and the art identifies these polymers as suitable ingredients for the adhesive composition. The fact that the "reinforcing resins" are identified as optional ingredients in the art does not negate the obviousness of their incorporation.

8. The claimed tackifiers are extensively discussed at column 3.

9. The ionomer resin claimed is not positively set forth in claim 1. The language "up to" reads on a minimum amount of zero. This rationale applies to the diluent and wax of claim 3.

10. The rejections over Venkatasanthanam and Mchaffy not restated here are withdrawn.

***Conclusion***

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
